

WIRING DIAGRAM**TECHNICAL SPECIFICATION**

Type of element	NTC 10K, B25/85 = 4300
Tolerance on R25 value	±5%
Temperature element wiring	Two-wire configuration
Measuring range	0°C to 125°C
Power supply	SELV or PELV
Maximum power dissipation	60 mW
Sensor IP code	IP 54 according to EN 60529
Material of housing / diameter	Brass / 4 mm
Dielectric strenght	500 VAC according to EN 60730-1
Insulation resistance	> 200 MΩ at 500VDC, 25±3°C
Supply cable type	Silicone 2 x 0,22 mm ²
Supply cable lenght	0,3 m

OPERATING CONDITIONS:

- Temperature round the supply cable: 0°C to 125°C
- Relative humidity of the surroundings: 10 to 100%
- Atmospheric pressure: 70 to 106 kPa
